

*The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.*

This is to inform you that Lot No. 23061L1C0 of the above product, distributed by American Regent, Inc. is the subject of a Recall by the manufacturer, American Regent, Inc. Recall of this product to USER LEVEL was initiated due to an identified potency issue at the 12-month room temperature timepoint, following 12 months of storage under refrigeration. The PI states:

“Storage is permitted for up to 12 months at controlled room temperature (USP) 20°C to 25°C (68°F to 77°F) within the expiry date. Once removed from refrigeration, mark the unopened vial with the revised 12-month expiration date. Do not return Vasopressin to the refrigerator after it has been stored at room temperature. Discard the product after 12 months at room temperature or at the expiry date, whichever is earlier.”

There were no adverse events associated with this lot. No safety issue was identified for this product.

Vasopressin injection is indicated to increase blood pressure in adults with vasodilatory shock who remain hypotensive despite fluids and catecholamines.
