

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Glenmark Pharmaceuticals, Inc. is issuing a recall to Retail level involving Ciclopirox Gel 0.77%.

Recall of these batches have been initiated due to a market complaint received for the broken tube of an unknown batch. As a part of the market complaint investigation, all the reserve samples for the batches that are within shelf life were verified for any similar defects. During this verification, five (5) reserve sample tubes of Batch # 19242028; 30g tube packs were observed with the defect “Tube opening at sealing portion upon pressing at the bottom of the tube.”

The same Batch # 19242028 was also packed in 45g and 100g tubes packs. During evaluation of the reserve samples of 45g and 100g no similar defect was observed for any of these tubes. However, as a precautionary measure, voluntary recall is proposed for all the three packs of 30g, 45g and 100g packs as both these packs are from the same bulk batch and were packed in same campaign on the same filling machine.

PRODUCT NAME: Ciclopirox Gel 0.77%
