LICENSING COMMITTEE REPORT

Seung Oh, Licensee Member, Chairperson
Jignesh Patel, Licensee Member, Vice-Chairperson
Renee Barker, Licensee Member
Trevor Chandler, Public Member
Jessica Crowley, Licensee Member
Jason Weisz, Public Member

During the meeting members will receive a summary of the Committee's work at its July 19, 2023 Committee Meeting.

a. Discussion and Consideration of Provisions for Remote Processing

Relevant Law

[BPC 4071.1, subdivision \(a\)](#) permits a pharmacist (or a prescriber or prescriber's agent) to "electronically enter a prescription or an order, as defined in [Section 4019](#), into a pharmacy's or hospital's computer from any location outside of the pharmacy or hospital with the permission of the pharmacy or hospital." This is known as "remote order entry."

Background

As part of the Board's response to the COVID-19 public health emergency and the initial need for social distancing, a "[Remote Processing Waiver](#)" was approved by the Board. This waiver expired on May 28, 2023. Under the provisions of the waiver, legal authorization for remote processing was expanded to allow for greater flexibility under pandemic conditions. "Remote Processing" is defined to mean the entering of an order or prescription into a computer from outside of the pharmacy or hospital for a licensed pharmacy. The Waiver allowed that, in addition to the provisions of BPC section 4071.1, pharmacists performing remote processing may also receive, interpret, evaluate, clarify, and approve medication orders and prescriptions, including medication orders and prescriptions for controlled substances classified in Schedule II, III, IV or V. Under the Waiver, remote processing included order entry, other data entry, performing prospective drug utilization review, interpreting clinical data, insurance processing, performing therapeutic interventions, providing drug information services, and authorizing release of medication for administration. The Waiver did not permit dispensing of a drug or final product verification by remote processing. Further, the Waiver

expanded the provisions of BPC section 4071.1 to allow for remote processing by pharmacy technicians and pharmacy interns to include nondiscretionary tasks, including prescription or order entry, other data entry, and insurance processing of prescriptions and medication orders for which supervision by a pharmacist provided using remote supervision via technology that, at a minimum, ensured a pharmacist is (1) readily available to answer questions of a pharmacy intern or pharmacy technician; and (2) verify the work performed by the pharmacy intern or pharmacy technician.

There were certain limitations and qualifiers regarding the Waiver, including that a pharmacist, pharmacy technician, or pharmacist intern relying on the Waiver must be licensed in California, and must be engaged in processing medication orders or prescriptions from a remote site or on the premises of a California-licensed pharmacy. The pharmacy must have authorized remote processing and must have appropriate policies and procedures as well as adequate training on those policies and procedures.

Last year the Board voted to sponsor legislation to make certain provisions of the remote processing waiver permanent. The Board sponsored legislation, but the legislation did not move because of significant opposition.

During the October 2022 Board meeting, members received public comment requesting that the Board schedule discussion on the issue. More recently, as part of the January 2023 Licensing Committee Meeting and February 2023 Board Meeting, members voted to sponsor legislation to address an acute need for hospitals and other licensed health care facilities to establish provisions for remote processing of medication chart orders necessary to ensure continuity of patient care for inpatients.

Agreement was not reached specific to if, and under what conditions, permanent authority for remote processing should be established for community pharmacies. Previous discussions have highlighted the complexity of the issue and various competing interests. Ultimately, it is incumbent on the Board to determine what is in the best interest of California patients.

Comments have also been made regarding other topics regarding pharmacists' authority to perform services outside of a licensed pharmacy. The Board's strategic plan includes strategic objective 1.1 to "Evaluate, and change if appropriate, legal requirements for authorized duties that can occur outside of a pharmacy to reflect the dynamic nature of the practice of pharmacy." It is recommended that the committee continue its discussion of remote processing.

During its January 2023 Meeting, members considered several policy questions, but did not reach consensus on the appropriate outcome for community pharmacy provisions, which would include mail order pharmacies. The meeting minutes, included as an attachment to the meeting materials provide information on the discussion. At the request of Chairperson Oh, to assist the committee and stakeholders with continuing its evaluation of the issue, draft statutory language was developed that could serve as a starting place.

As part of the April 2023 Meeting, members and stakeholders present considered a draft legislative framework that was provided as a means to facilitate discussion. As a quorum of the committee was not present, no recommendations were made. As such no updates were made to the legislative framework.

Summary of Committee Discussion

During its July 2023 meeting, members considered several questions to aid in determining if there are areas of consensus. Below is a summary of the comments received.

1. Does the Committee believe there is a benefit to consumers to allow for pharmacists to perform work from remote locations?

Members reached consensus that there is potential benefit to consumers to allow pharmacist to perform work from report locations. Members noted that remote work provides an opportunity to share workload but also expressed concern that remote work could also create pressure on pharmacist. Members noted the need to ensure safeguards are in place. Members also noted the potential for remote work may help to alleviate recruitment challenges for pharmacists in rural areas. Members noted that guardrails are necessary to ensure remote work does not result in less access to pharmacist access in communities.

Public comment also spoke in support of remote work for pharmacists. Comments suggested that remote work may create other employment opportunities for pharmacists. The Committee received several comments for pharmacists working in specialty pharmacies who noted benefits to consumers including a workplace that is free from distractions while lightening the load for pharmacists within the pharmacy.

Some members considered if provisions should be expanded to pharmacists not licensed in California; however, members did not reach consensus on this item and determined the issue should not be considered

as part of remote provisions. Members also considered if remote processing provisions should be limited to noncontrolled drugs.

2. Does the Committee believe there is a benefit to consumers, but only for specific types of pharmacy models, e.g., closed door pharmacies, specialty pharmacies?

Members considered if remote provisions should be limited to specific types of pharmacy models such a specialty pharmacy. Some members noted the potential value of remote work in responding to disasters and others noted concerns with potential PIC liability. Members concluded that provisions should apply to all pharmacies.

Public comment similarly agreed that remote processing provisions should encompass all pharmacies. Some public comment suggested that provisions should also apply to pharmacy technicians. The committee heard from several pharmacists working in specialty pharmacy that remote working allowed for better interaction with patients and improved workflow.

3. Does the Committee believe that discussion on these questions should be postponed until after the passage of Assembly Bill 1286 (Haney), the Board's patient protection measure?

Some members noted that a final solution would be easier if provisions in AB 1286 were in place but determined that continue the discussion on remote processing was appropriate to continue. Members noted that if some provisions from AB 1286 were not enacted, the provisions could be included in remote processing provisions.

Public comment suggested that the Board should keep the two issues separate. Public comment also discussed provisions regarding patient consultation and advised members that some states require documentation of the pharmacist providing the consultation.

4. Does the Committee believe the Board should sponsor legislation in this area?

Members determined it best for the Board to move forward with developing its policy in this area. Further, members agreed that development and sponsorship of a legislative proposal is appropriate.

The Committee did not receive public comment on this question.

5. Does the Committee believe the Board would benefit from additional flexibility to develop regulations in this area by securing broader regulation authority specific to remote processing?

Members spoke in support of securing regulation authority and noted that such an approach could allow the Board to respond more dynamically to changes.

Public comment also spoke in support of such an approach. Public comment also suggested that the Board should seek authority to write regulations to allow for final product verification for compounding.

Attachment 1 includes a copy of the language previously considered by the Committee.

b. Discussion and Consideration of Licensing Statistics

Licensing statistics through from July 1, 2022 – June 30, 2023, and three-year comparison data are provided in **Attachment 2**.

During FY 2022/23, the Board has received 14,386 initial applications, including:

- 1,312 intern pharmacists
- 3,468 pharmacist exam applications (2,009 new, 1,459 retake)
- 163 advanced practice pharmacists
- 5,494 pharmacy technicians
- 386 community pharmacy license applications (385 PHY - 17 chain, 368 nonchain, 1 PHR)
- 68 sterile compounding pharmacy license applications (52 LSC, 15 NSC, 1 SCP)
- 110 nonresident pharmacy license applications
- 13 hospital pharmacy license applications

During FY 2022/23, the Board has received 488 requests for temporary site license applications, including:

- 276 community pharmacy license applications

- 31 sterile compounding pharmacy license applications
- 63 nonresident pharmacy license applications
- 11 hospital pharmacy license applications

During FY 2022/23, the Board has issued 7,619 individual licenses, including:

- 1,323 intern pharmacists
- 1,815 pharmacists
- 154 advanced practice pharmacists
- 3,742 pharmacy technicians

During FY 2022/23, the Board has issued 770 site licenses without temporary license requests, including:

- 294 automated drug delivery systems (290 AUD, 4 APD)
- 68 community pharmacies
- 0 hospital pharmacies

During FY 2022/23, the Board has issued 335 temporary site licenses, including:

- 203 community pharmacies
- 11 hospital pharmacies

A review of three-year data reveals a 2 percent decrease in applications for individual licenses, primarily driven by declines in intern applications and pharmacist examination applications. Further, the Board has experienced an 18 percent increase in site applications received with the most notable growth in clinic applications and automated drug delivery systems. The data reveals a 2% growth in nonchain community pharmacy applications and a 23% reduction in community chain pharmacy applications.

Further, the Board has experienced a 6 percent decline in the number of individual licenses issued and a 60 percent overall increase in the number of site applications issued.

The Board has experienced an overall 40% increase in the number of discontinuances of business notifications it has received. The data reveals a 250% increase in closures of chain community pharmacies and a 42% increase in closures of nonchain community pharmacies. Overall, the Board has experienced a 3% reduction in its total licensee population.

Attachment 1

Draft Statutory Proposal: Community Pharmacy Remote Processing

(a) A pharmacist licensed in California, employed by and acting on behalf of a pharmacy licensed in California may, from any location outside of the licensed pharmacy and within California, perform certain remote functions, only where:

(1) The remote functions performed are limited to: order entry and other data entry; prospective drug utilization review; interpretation of clinical data; insurance processing; therapeutic intervention; provision of drug information; authorizing medication release for administration; or other pharmacist clinical services authorized in this chapter.

(2) The pharmacist-in-charge for the pharmacy has made and signed, under penalty of perjury, a written determination that (a) remote work by pharmacists is necessary to enable provision of improved direct patient care by pharmacists working in the pharmacy, and (b) reliance on remote work by pharmacists will not be used as a means to, or lead to, reduced staffing levels in the pharmacy, and on those grounds the pharmacist-in-charge authorizes remote functions, and the pharmacy has provided that writing to the board. The board may request a renewal of this writing on an annual basis or more frequently where circumstances warrant. The pharmacy shall also keep and maintain a copy consistent with the provisions of sections 4081 and 4105.

(3) Each pharmacist who will be performing remote functions has signed, under penalty of perjury, a written consent form designating the location from which that pharmacist will perform remote functions, certifying that the location is secure, acknowledging that the board may inspect that location, and consenting to such inspection. Each signed consent shall be provided to the board. The pharmacy shall also keep and maintain a copy of each signed consent consistent with the provisions of sections 4081 and 4105.

(4) The pharmacy, under the supervision of the pharmacist-in-charge, has developed and implemented policies and procedures that outline the authorized functions to be performed and describe methods for protecting the confidentiality and integrity of patient information. The policies and procedures shall expressly prohibit the removal of written, printed, or electronic pharmacy records from the pharmacy in hardcopy or on an electronic storage device, and the printing and storage of protected health information on a device that is outside of the licensed pharmacy. The policies and procedures shall be made available to the board upon request.

(5) The pharmacy, under the supervision of the pharmacist-in-charge, has ensured that each pharmacist designated to perform remote functions is trained on the scope and limitations of such services, and on the pharmacy's policies and procedures.

(b) Each pharmacy authorizing pharmacists to perform remote functions shall ensure:

(1) That all such pharmacists have secure electronic access to the pharmacy's patient information and to other electronic systems accessible by onsite pharmacists during business hours. A pharmacy's system shall always use biometrics or similar technology to ensure the identity of any pharmacist working remotely. Pharmacists working remotely cannot use portable electronic devices or laptop computers to perform such functions.

(2) That each record created, viewed, modified, or deleted by a pharmacist working remotely complies with all recordkeeping requirements for pharmacies established in this chapter, including capturing the positive identification of the pharmacist involved in the remote review and verification of a medication order or prescription. A pharmacy shall continue to maintain records of all medication orders and prescriptions orders in the pharmacy's information system. Such records shall be reviewed by the pharmacist-in-charge to confirm compliance. All records shall be maintained in an auditable form detailing each access to a record, whether onsite or remote. All records shall be kept in accordance with section 4081 and be readily retrievable as required in section 4105.

(c) Any pharmacy, pharmacist-in-charge, or pharmacist that discovers any violation or possible violation of the federal Health Insurance Portability and Accountability Act of 1996 (Public Law 104-191) or the Confidentiality of Medical Information Act (Civ. Code, § 56 et seq.), shall, within 30 days of such discovery, report the incident to the board. In addition to any other enforcement action that may be taken by the board, a violation of this sort may result in the issuance of a citation pursuant to the citation and fine authority of the board, with a fine not to exceed \$[fine amount] per occurrence.

(d) Nothing in this subdivision shall authorize a pharmacist to dispense a drug or perform final product verification via remote connection or without being present.

(e) Notwithstanding any other provision of law, a violation of this section may subject the person or entity that has committed the violation to either a fine of up to ten thousand dollars (\$10,000) for the first occurrence pursuant to a citation issued by the board or a civil penalty of ten thousand dollars (\$10,000) for the first occurrence. A second violation of this section may subject the person or entity that has committed the violation to either a fine of up to fifty thousand dollars (\$50,000) or a civil penalty of fifty thousand dollars (\$50,000) for the second occurrence. Any subsequent violation of this section may subject the person or entity that has committed the violation to either a fine of up to two hundred fifty thousand dollars (\$250,000) or a civil penalty of two hundred fifty thousand dollars (\$250,000) for all subsequent occurrences.
