

# HCAI Research Data Center Dashboard Overview

Eric Neuhauser, Research and Evaluation Section Chief, Health Workforce  
Development, HCAI

# RDC Overview

Assembly Bill 133 created the Health Workforce Research Data Center

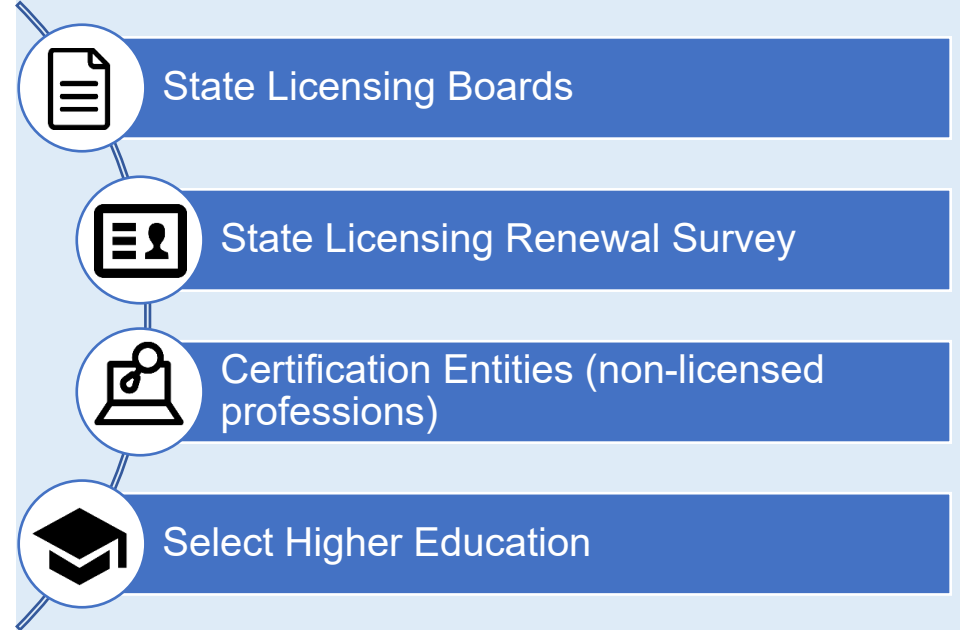

## Overall Purpose:

Serve as central source of health care workforce and education data

Provide better and timelier data and analysis to inform state policy regarding issues of workforce shortage, equity, and distribution.

**Health and Safety Code §128051** Directs HCAI to collect the following data:

- Supply
- Geographical Distribution
- Diversity
- Demand
- Educational Capacity

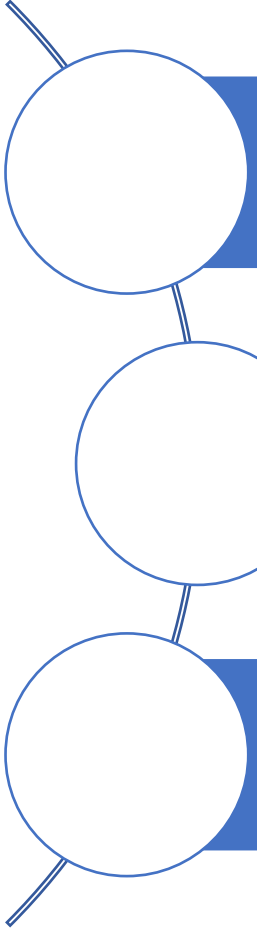

# HCAI Survey Response Rates

- Upper 80s to mid 90s for most questions.
- Cell Based Weighting will be used to statistically adjust responses until the percent of the workforce surveyed is closer to 100%
- Report *percentages* in our dashboards rather than *counts*. Weighted percentages should remain stable even as counts increase over time
- Dashboard Data Response Rates for Active In-State Registered Pharmacist & Advanced Practice Pharmacist Licenses as of 01/03/2023

Question	Total Surveys	Decline to State	Not Asked/NA	Response Rate
1. Ethnicity	17,959	1,153	0	93.6%
2. Race	17,959	1,432	0	92.0%
3. Initial EDU	17,959	500	0	97.2%
5. Highest EDU	17,959	475	0	97.4%
15. Language(s) Spoken	17,959	962	0	94.6%
16. Sex at Birth	17,959	1,322	0	92.6%
17. Gender Identity	17,959	1,360	0	92.4%
18. Sexual Orientation	17,959	2,639	0	85.3%
19. Disability Status	17,959	2,306	0	87.2%

# Cell Based Weighting

Statistically adjust responses to account for differences between the respondents (sample) and the complete universe of active licenses (population) for each response group

Weights are re-calculated each month for each question based on latest set of license and survey data

Decline to State, Not Asked or Skipped answers are excluded

# Percent Surveyed and Submission Rates

---

- Because of renewal cycle, will take roughly 2 years to reach near 100% surveyed
- Will never fully reach 100% because of paper renewals and new licenses
- Dashboard Data Response Rates for Active In-State Registered Pharmacist & Advanced Practice Pharmacist Licenses as of 01/03/2023

License Name	Active Licenses	Total Surveys	Percent Surveyed
Advanced Practice Pharmacist	1,159	575	49.6%
Registered Pharmacist	40,660	17,384	42.8%
Grand Total	41,819	17,959	42.9%

# Challenges and Opportunities

---

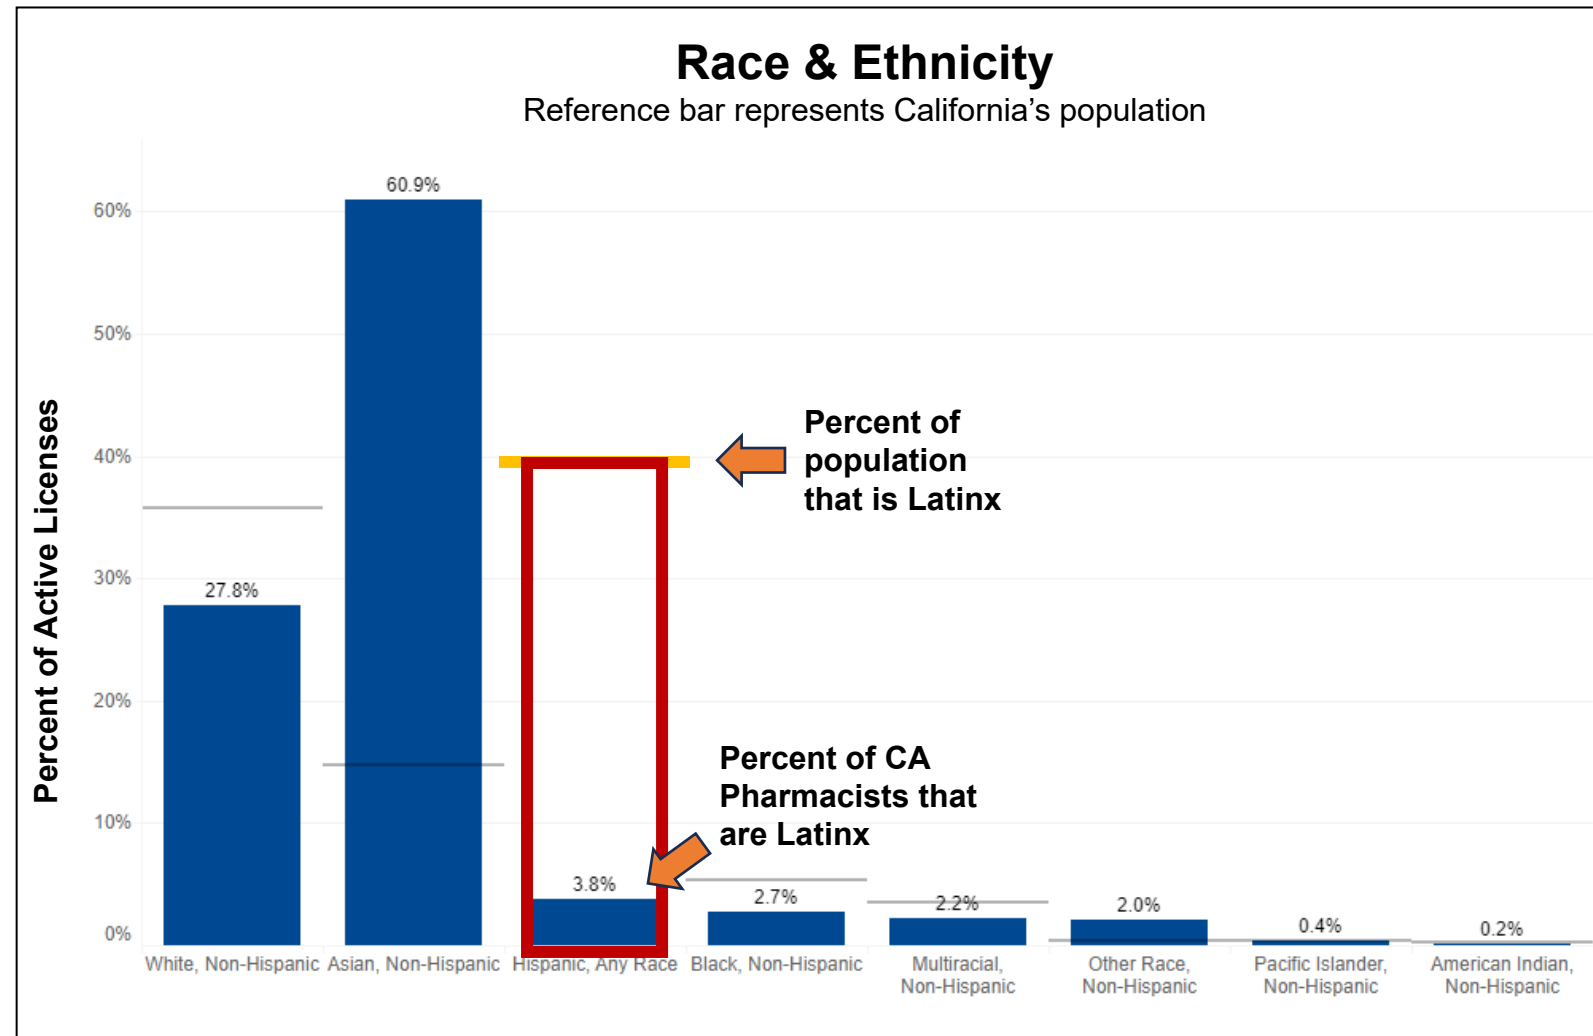

- Encourage online renewals over paper renewals
  - Paper renewals collect no survey data
- Increase response rates (reduce Decline to States)
  - Particularly NPI & Practice Address(es)
- Consider collection of data at time of application, not just at time of renewal

# Race & Ethnicity of California's Health Workforce

- Updated to include 47 different professions and regional level breakdowns
  - Can filter by Workforce Category, License Name, and Region
- Expanded trends over time to the last 30 years
- Key Questions
  - What is the current diversity of health workforce professionals?
  - How do they compare to the CA population?
  - How has diversity changed over time?
- Data will be refreshed annually

# Race & Ethnicity of CA's Health Workforce (1 of 2)

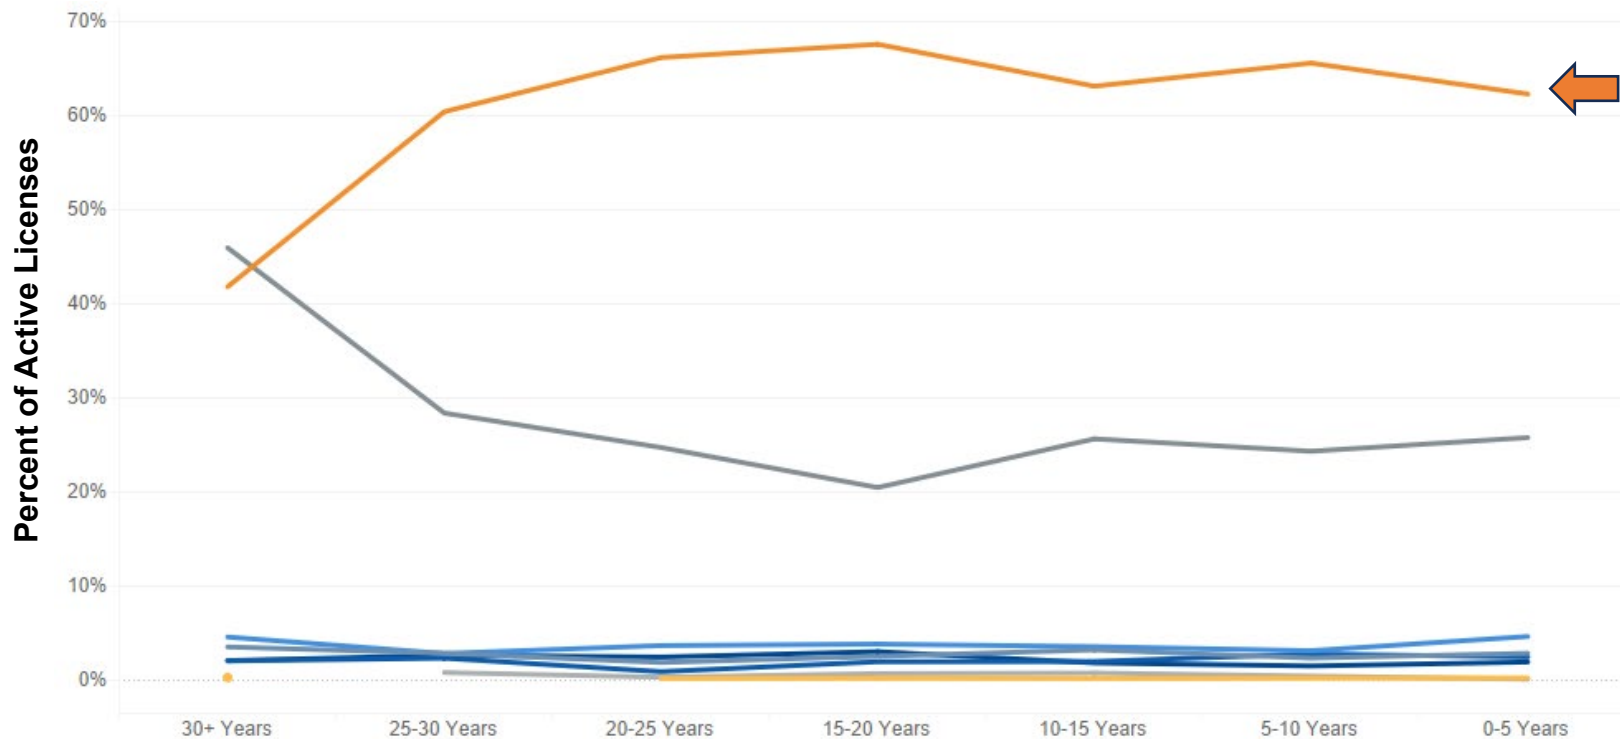

- The Latinx population is the most underrepresented group in the health workforce
- While the population of Latinx in California is 40%, the RPH & APH workforce is only 3.8%
- Latinx is also underrepresented in all six workforce categories and all nine geographic regions that HCAI examines

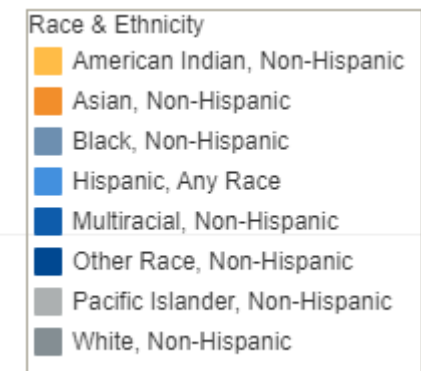

# Race & Ethnicity of CA's Health Workforce (2 of 2)

## Race & Ethnicity over Time

- Over the last 20 years, Asian, Non-Hispanics have made up more than 60% of the Actively licensed Registered Pharmacists & Advanced Practice Pharmacists by license issue date

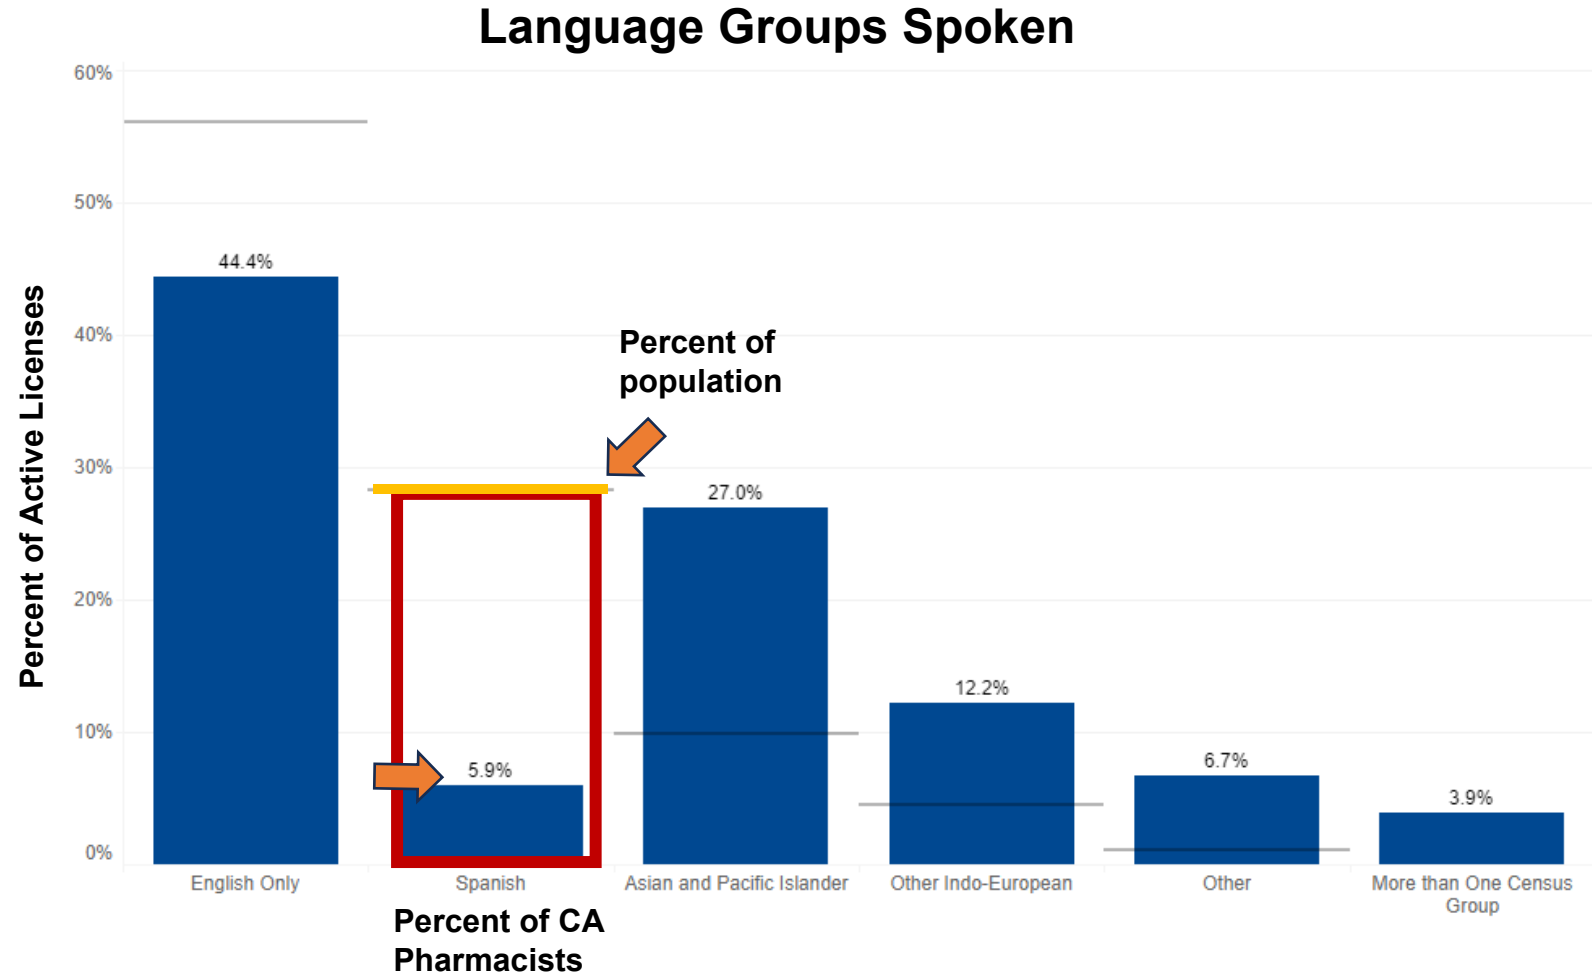

# Languages Spoken by CA's Health Workforce

- Includes 47 different professions and regional level breakdowns
  - Can filter by Workforce Category, License Name, and Region
- Trends over time for the last 30 years
- Key Questions
  - What languages are spoken by the health workforce?
  - How do they compare to the CA population?
  - How has language diversity changed over time?

# Languages Spoken by CA's Health Workforce

- Spanish is the most underrepresented language in the health workforce and is underrepresented in all six workforce categories and all nine regions in CA

# CA's Health Workforce Education Pathways

- Includes 43 different professions, by Region, Race & Ethnicity, Assigned Sex at Birth, and School Location
  - Can filter by Workforce Category, License Name, and Region
  - Does not include Dentists, Doctors of Podiatric Medicine, Osteopathic Physician and Surgeons, and Physician and Surgeons
- Trends over time for the last 30 years
- Key Questions
  - What are the pathways to licensure for the health workforce?
  - Is the pathway different for people from underrepresented groups?
  - How have the pathways changed over time?

# CA's Health Workforce Education Pathways

Highest Education Levels

- More female pharmacists receive a Doctoral degree than male pharmacists (sex assigned at birth)

# Future Work

- Workplace settings
- Detailed race and ethnicity metrics
- Sexual Orientation and Gender Identify Metrics
  - Data De-Identification Guidelines result in broader geography breakdowns
- Medi-Cal threshold languages
- Supply/Demand
  - Backfilling missing HCAI data with DCA data for modeling
- Continuous Improvement on DCA/Survey data

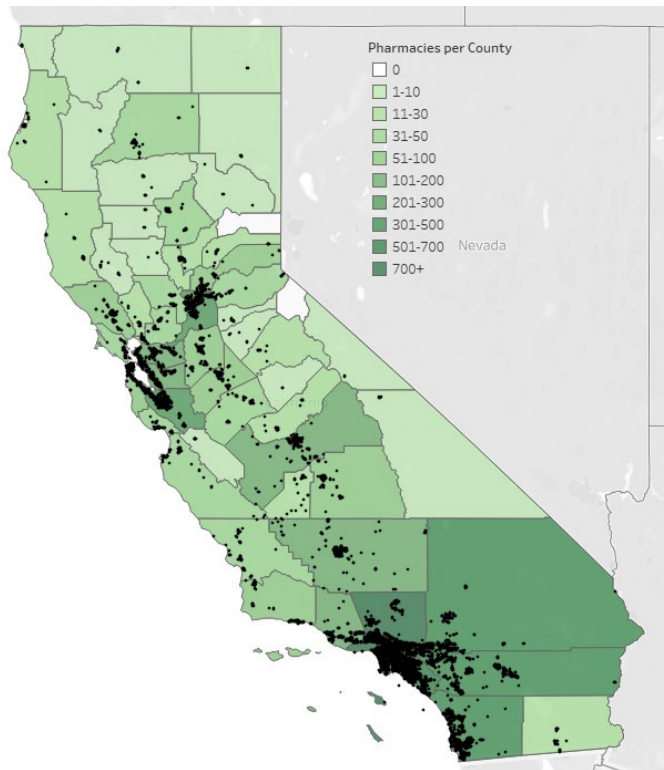

# Custom Data Request - Pharmacy Deserts

- Where are they?
- How are they best defined?
  - Population based, Geography based, Drive-Time based, Mix of all three
- Who is impacted most by them?
  - Age Range(s), Urban/Rural, Race & Ethnicity, Federal Poverty Level, etc.
- Can we watch deserts grow/change over time?
  - Planning to re-analyze in 6 months

# Geography Based

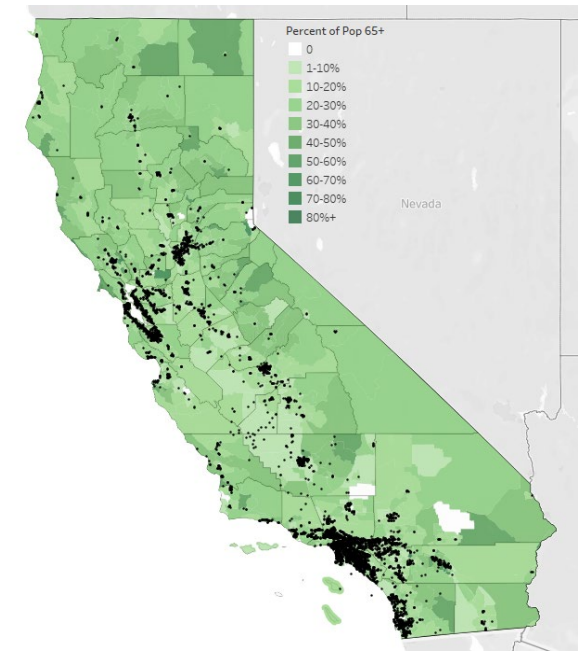

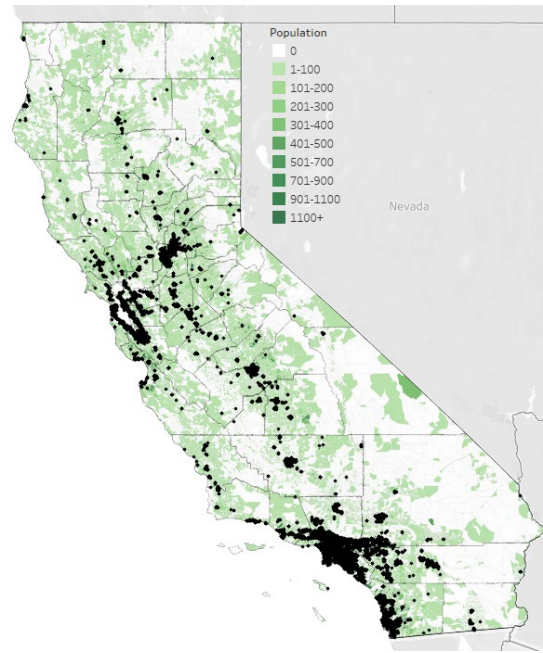

- Number of pharmacies per area
- Urban vs Rural pharmacies

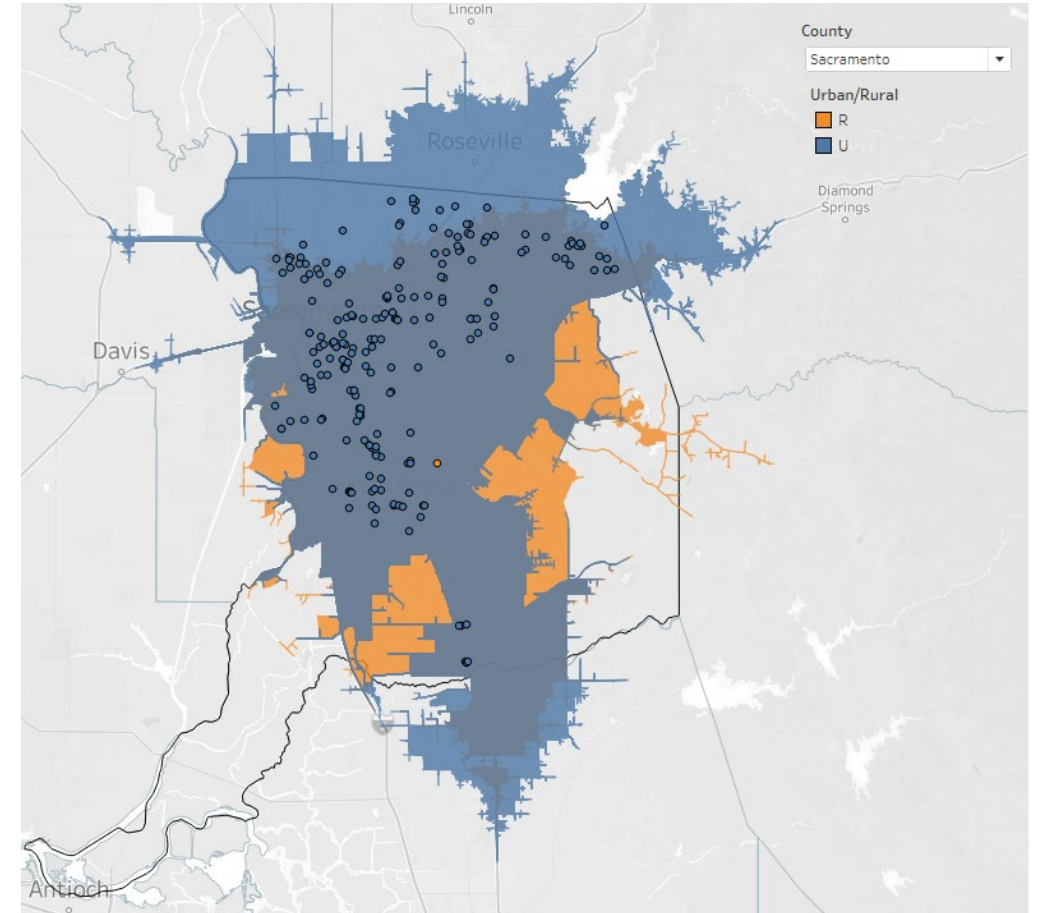

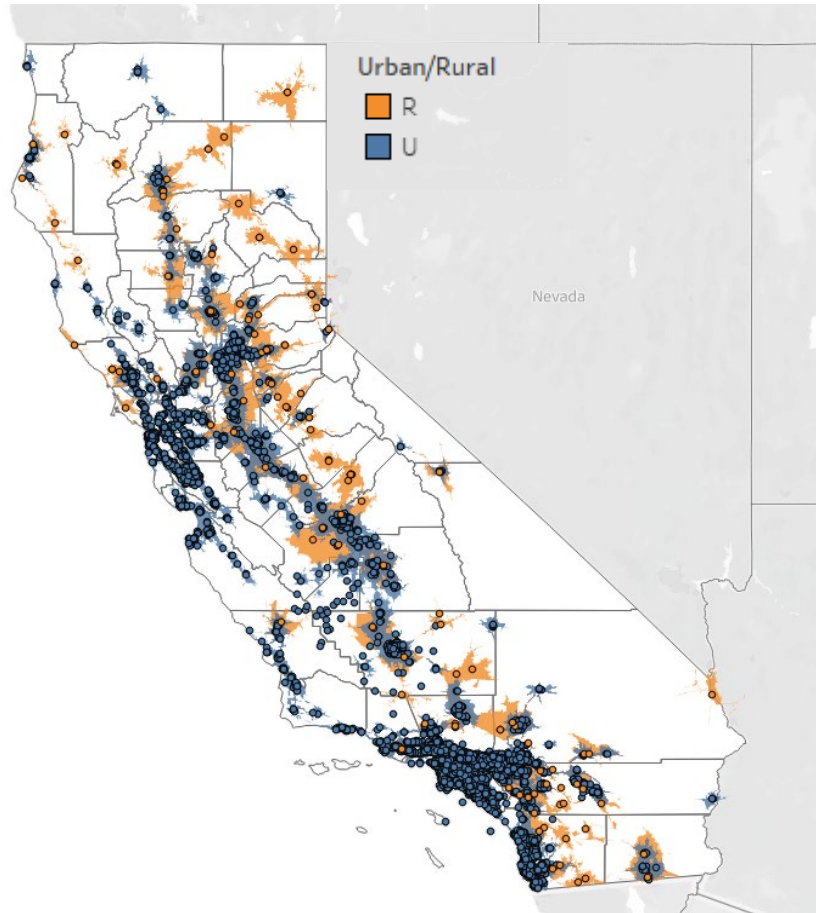

# Population Based

- Population to Pharmacy Ratios
- Population density
- Percent of Population by Age Range(s)

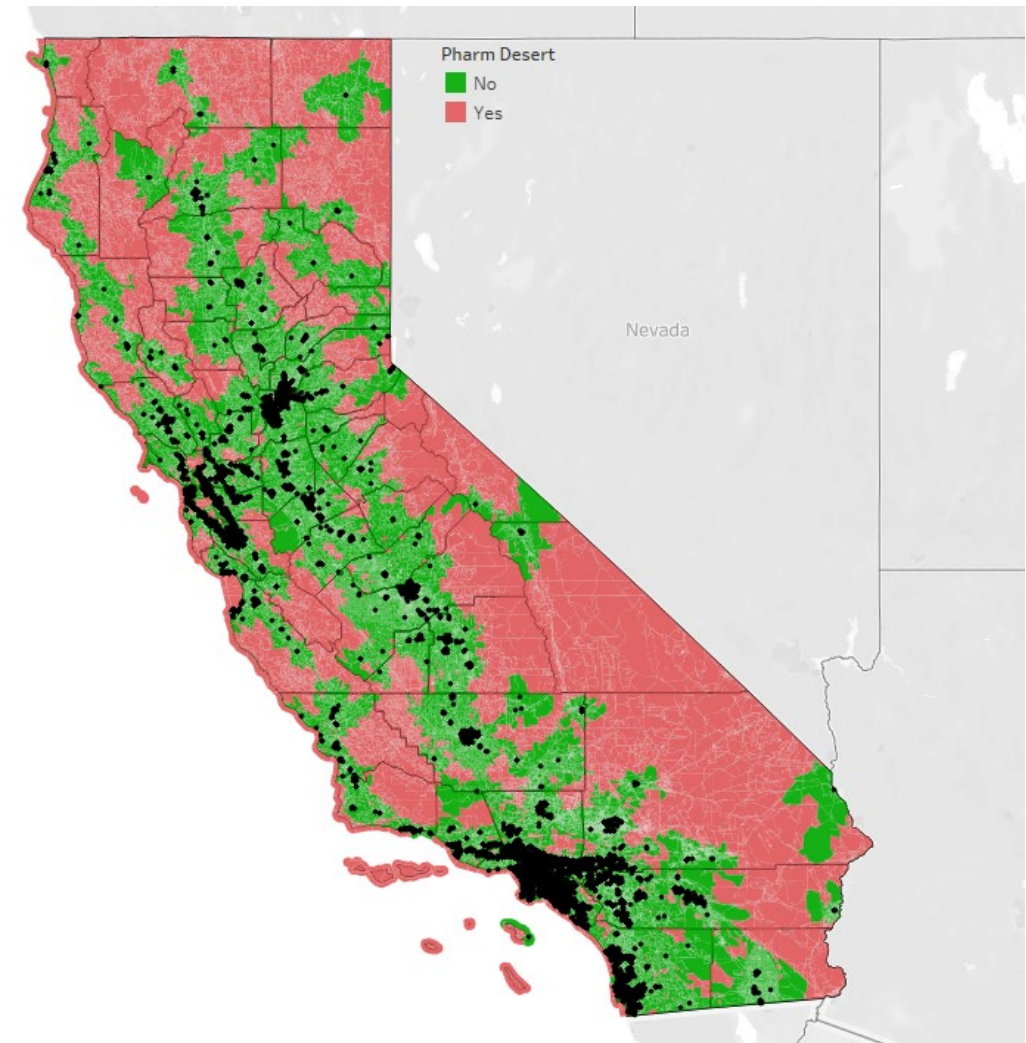

# Drive Time Based

- Urban Pharms = 15 minutes, Rural Pharms = 30 minutes

# Combination of all three

- Desert = Areas/Populations *not* reached by drive time polygons.
- Demographics of Deserts?
  - Population counts
  - Age Range(s)
  - Race & Ethnicity breakdowns
  - Poverty Levels
- Increasing or decreasing over time?
